EDUCATION

JSS Academy of Technical Education, Noida

B.Tech in Computer Science and Engineering

Sept. 2023 – May 2027

CGPA: 7.26/10

SKILL SET

Languages: C/C++, Java, Python, SQL, JavaScript, TypeScript, HTML/CSS

Frontend: React.js, Next.js, AngularJS, Tailwind CSS, Bootstrap, Figma

Backend: Node.js, Express.js, PHP, REST APIs

AI & LLM: OpenAI API, Claude API, Prompt Engineering, Embeddings

Databases: MongoDB, PostgreSQL, MySQL, Supabase

Developer Tools: Git, GitHub, Docker, Linux, VS Code, AWS, Netlify, Render

Libraries: Pandas, NumPy, Matplotlib

EXPERIENCE

AICTE GenAI & Cloud Computing Summer Internship

BharatCares (CSRBOX) — In collaboration with IBM

June 2026 – July 2026

Remote

- Completed a 6-week internship focused on Generative AI, Prompt Engineering, Large Language Models (LLMs), and Cloud Computing fundamentals.
- Built hands-on AI applications and explored real-world use cases using modern GenAI tools and cloud technologies through guided industry sessions.
- Learned AI application development workflows, prompt engineering techniques, and best practices for deploying AI-powered solutions.
- Collaborated in practical assignments and gained exposure to AI-driven software development and cloud-based architectures.

PROJECTS

ResuMatch

[Live Demo](#)

- Built an AI-powered resume and job matching platform that helps users assess how well their resume fits a job description and discover relevant job opportunities.
- Integrated AI resume analysis to generate match scores, highlight missing skills and keywords, and provide optimized resume suggestions with explanatory insights.
- Developed a job recommendation system that scores listings based on skill match, filters by multiple criteria, and provides quick-apply links for better usability.
- Designed a responsive modern interface using React.js, TypeScript, Tailwind CSS, and shadcn/ui, and deployed the application on Vercel.

MediCompare

[Live Demo](#)

- Developed a medicine comparison platform that helps users make informed healthcare decisions by comparing medicines based on composition, manufacturer, pricing, substitutes, dosage, and key product details.
- Implemented an advanced search and comparison engine with intelligent filtering, enabling users to quickly discover equivalent medicines and evaluate multiple alternatives side by side.
- Built a scalable full-stack application using React.js, TypeScript, Node.js, Express.js, and MongoDB, with RESTful APIs optimized for fast medicine lookup and data retrieval.
- Designed a modern healthcare-focused interface using Tailwind CSS and shadcn/ui, delivering a responsive and intuitive user experience across desktop and mobile devices.

ACHIEVEMENTS

- LeetCode Knight:** Max Contest Rating **1994**. Ranked among the **Top 2.68%** of active contestants globally.
